ABSTRACT

Designed both to assist in reference inquiries relating to the subject, scope, dates, and indexing of microform collections, and to function as a source for current awareness of new microform acquisitions, this guide lists microform sets, microform collections, important series of historical or research interest, and personal papers and manuscripts held by the library at SUNY-Brockport. Entries are organized into closely defined topics under the following general subject areas: history, politics and government, U.S. government documents, area studies, fine arts, literature, social sciences, and minority and women's studies. INTRODUCTION

The Guide to Collections and Major Series in Microform at Drake Memorial Library is designed both to assist in reference inquiries relating to the subject, scope, dates, and indexing of microform collections and to function as a source for current awareness of new microform aquisitions. It is hoped also that the guide will promote interest in currently under-utilized collections.

The scope of the guide encompasses 1.) microform sets, eg.: Early American Imprints, the Library of American Civilization, British Sessional Papers; 2.) microform collections, eg.: the Richardson Collection (a collection of early British and European works on dance); 3.) important series of historical or research interest, eg.: JSAS: Catalog of Selected Documents in Psychology, Congressional Record; and 4.) personal papers and manuscripts, eg.: the Papers of George Washington Carver. Monographs and individual magazines and newspapers in microform are generally excluded from the guide.

Entries in the guide are organized first by general subject areas, eg.: FINE ARTS, POLITICS AND GOVERNMENT, PHYSICAL EDUCATION AND SPORTS, etc., then subdivided into more closely defined topics which are identified numerically, eg.: FINE ARTS - (15) MUSIC. Each title in a given subgroup is identified by an item-specific, alphanumeric designation, as in:

FINE ARTS - (15) MUSIC - (15h) Works of Georg Frederic Handel.

Entries uniformly include a statement on content and scope, dates, microformat, microform call number, a description of the arrangement of the material on microform, notes on relevant guides, indexes, and bibliographies, and information on card catalog representation. The pages of the guide are unnumbered to accomodate the inclusion of future entries, which will be listed in addenda sections of both the title index and table of contents.

It should be noted that the guide includes collections housed outside the parameters of the microforms area. These include: College Catalog Collection in Microfiche in the Special Materials Center, ERIC Reports in the Reference area, and Tests in Microfiche, also located in the Special Materials Center.

For citations to the review literature on 200 of the more major microform collections, as well as expanded notes on content, consult Suzanne C. Dodson's excellent Microform Research Collections: A Guide (REF Z 1033 .M5 D64 1978b). It may be of interest to note that only 30% of the 93 titles described in the present guide are also included in Dodson's work. Her definition of "collection" is however, far less liberal than was deemed useful for the more general purposes of this guide.

Appended to the guide are a list of the newspapers on microfilm under Mic-2 and a bibliography of sources owned by Drake Memorial Library pertaining to many aspects of microforms and microform hardware. Thoughts and suggestions for pertinent additions to the Appendix relating to the use of individual sets, or relevant bibliographies, are welcomed.

Special thanks goes to Mrs. Barbara White, an untypically persevering typist.

Microfilm
Mic-5
AC
1

CONTENT: Ongoing project of microfilming the entire output of books and printed materials published in England (in any language) and of books in English printed elsewhere dating from the introduction of printing in England in 1475 up to and including 1640.

There is no order inherent in the filming of this series, so that one or more of the following indexes must be used to locate an individual item on microfilm.

INDEX/BIBLIOGRAPHY:

1.) The series is based on A Short-Title Catalogue of Books Printed in England, Scotland, and Ireland and of English Books Printed Abroad, 1475-1640 compiled by A.W. Pollard and G.R. Redgrave (Mic-Index, Mic-5 AC 1 source) in two volumes, which gives abridged entries (including author, publication date, size, and location of extant volume) for all English books printed before the end of 1640. It is arranged alphabetically, by main entry, and each entry is assigned an item specific number ("STC" number, for Short-Title Catalogue) by use of which the appropriate microfilm reel number can be found in the following sources.

2.) English Books, 1475-1640: Cross-Index by STC Numbers (Mic-Index, Mic-5 AC 1 Cross Index) cross-indexes Short-Title Catalogue numbers with reel numbers on which items may be found. Issues cumulate from time to time.

3.) Early English Books, 1475-1640 (Mic-Index, Mic-5 AC 1 Yrs.--) lists the contents of each reel, by reel number. It is issued yearly and the contents cumulate periodically.

4.) A Guide on "How to Use Early English Books" is available.

CONTENT: This series continues the purpose and content of its predecessor in microfilming copies of all books extant printed in England and British America and of all books in English printed in other countries from 1641-1700. Various editions of the Bible, Statutes, and titles appearing in Evans' Early American Imprints are excluded from the series. Serial titles are also not included.

Again, titles have not been filmed in any sequence, thus necessitating the use of the following guides in order to locate a title on microfilm.

INDEX/BIBLIOGRAPHY:

1.) The series is based on the Short-Title Catalogue of Books Printed in England, Scotland, Ireland, Wales, and British America and of English Books Printed in Other Countries, 1641-1700, compiled by Donald Wing (Mic-Index, Mic-5 AC 2 sources), in three volumes, which lists items by main entry and includes publication date, size of volume, and known location of copies. Each entry is assigned an alphanumeric designation (i.e., D 2281) the first letter of which coincides (generally) with the first letter of the main entry.

2.) Early English Books, 1641-1700, Selected From Donald Wing's Short-Title Catalogue (Mic-Index, Mic-5 AC 2 Cross-Index Years 1-16) is a cross-indexing of Wing's Short Title Catalogue numbers with reel numbers on which specific items may be located. It is applicable for use only to the first 16 years of microfilming of the series.

3.) Early English Books, 1641-1700, Selected From Donald Wing's Short-Title Catalogue (Mic-Index, Mic-5 AC 2), is a guide which lists the contents of each reel, by reel number. It is issued yearly and the contents cumulate periodically.

TITLE INDEX

Explanation: To facilitate quick use of the guide, the title index includes many popular or "catch" titles. For example, the Early American Imprints collection is often referred to simply as "Evans" or "American Antiquarian Society", such that they logically find a place in an index of this kind. Personal papers and individuals' collected works are indexed by both title and author (eg.: both George Washington Carver Papers and "Carver, George Washington. Papers will be indexed." Generic titles are indexed by author (eg.: Royal Historical Society. Publications). Often used acronyms (primarily governmental in origin) have also been incorporated into the index.
